ABOUT Us

Eleman was founded with the title Eleman Home Design in 2009. As a result of many years experience in Aluminium Profile Market, we took a decision to adopt a new formation, and in 2009 under the brand "ELEM AN" the company continued its activities in Iran.

OurMission

Eleman aims to provide reliable and effective service at every level of the sale according to our customer expectations. As a whole, we see our customers as our partners. We aim to make a huge difference by increasing our market share and brand value by the innovations we brought to the Aluminium Business.

OurVision

We seek to develop R&D studies and product diversity by the light of technological changes. Eleman targets to be a leader in Aluminium Profile Business in which we operate by "innovative" and "distinctive" services, and maintain that leadership.

LIVORNO Series

This particular shower enclosure system is both unique and remarkable in appearance. The reason why this system is so unique is due to the sharp surface design and smart structure.

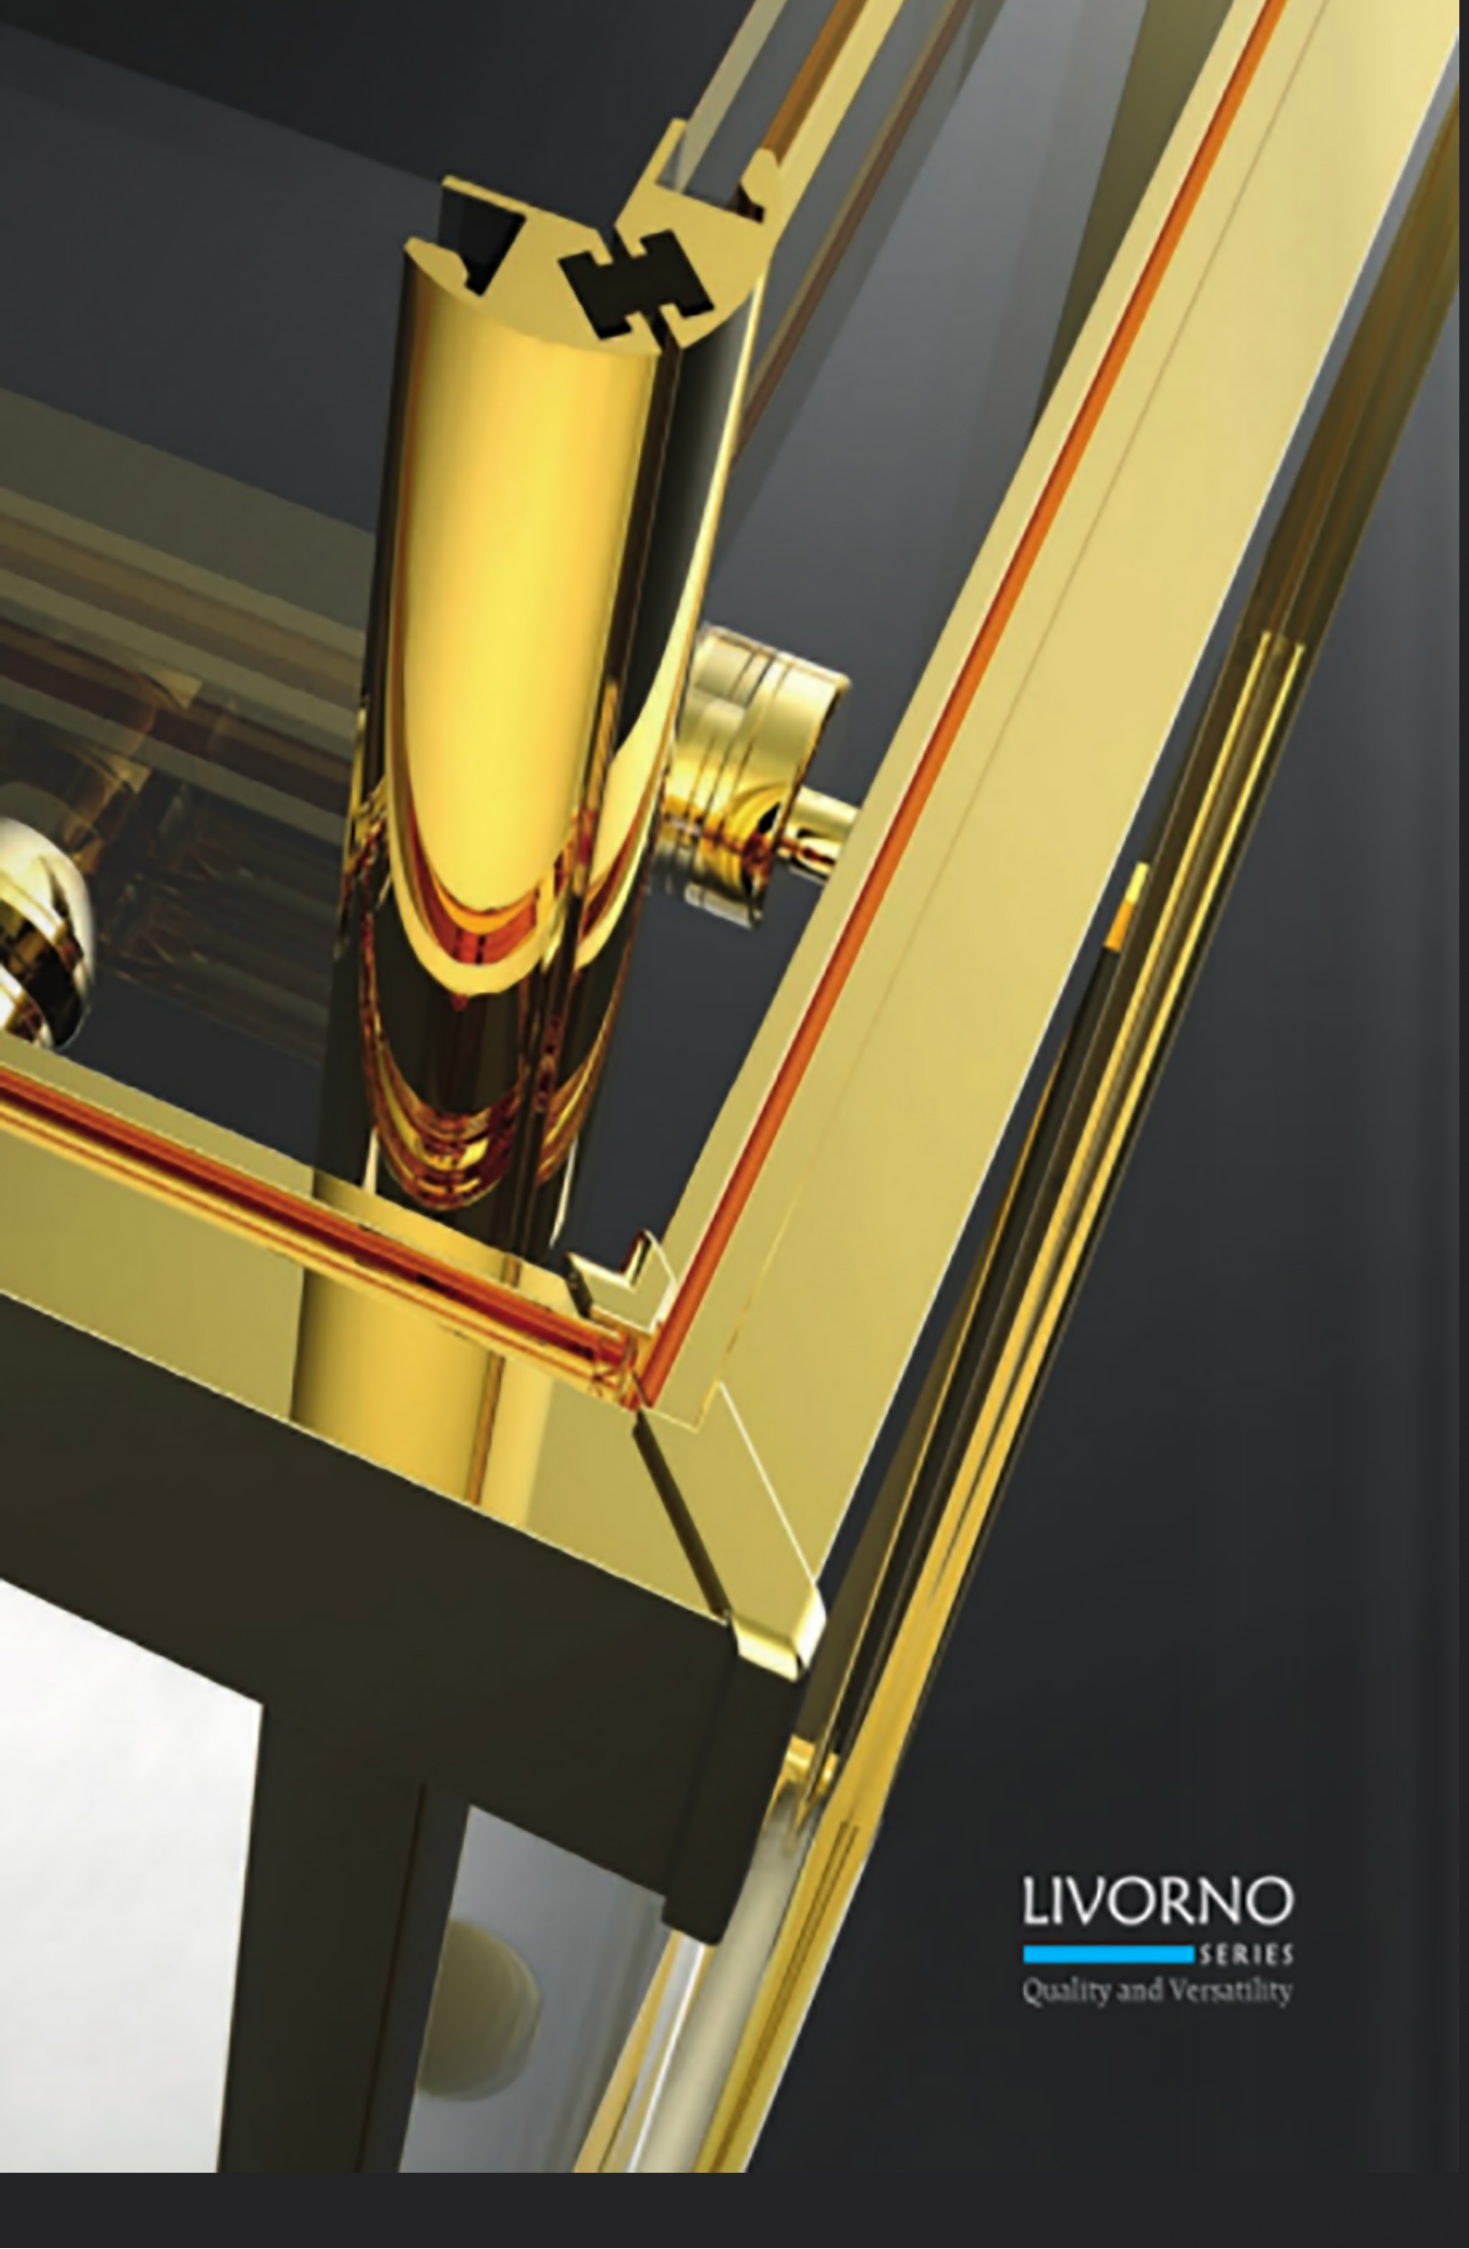

However alternative combinations are also available if desired. In addition to its unique appearance this enclosure system can be easily assembled and silicone usage is not necessarily required. This is because of the special glass wicks that had been manufactured for Livorno.

Corner cabins, however require a 45° cut to the rail profiles and in order to connect two rail profiles to each other the manufacturer has to use specially designed corner connector which makes it look smarter.

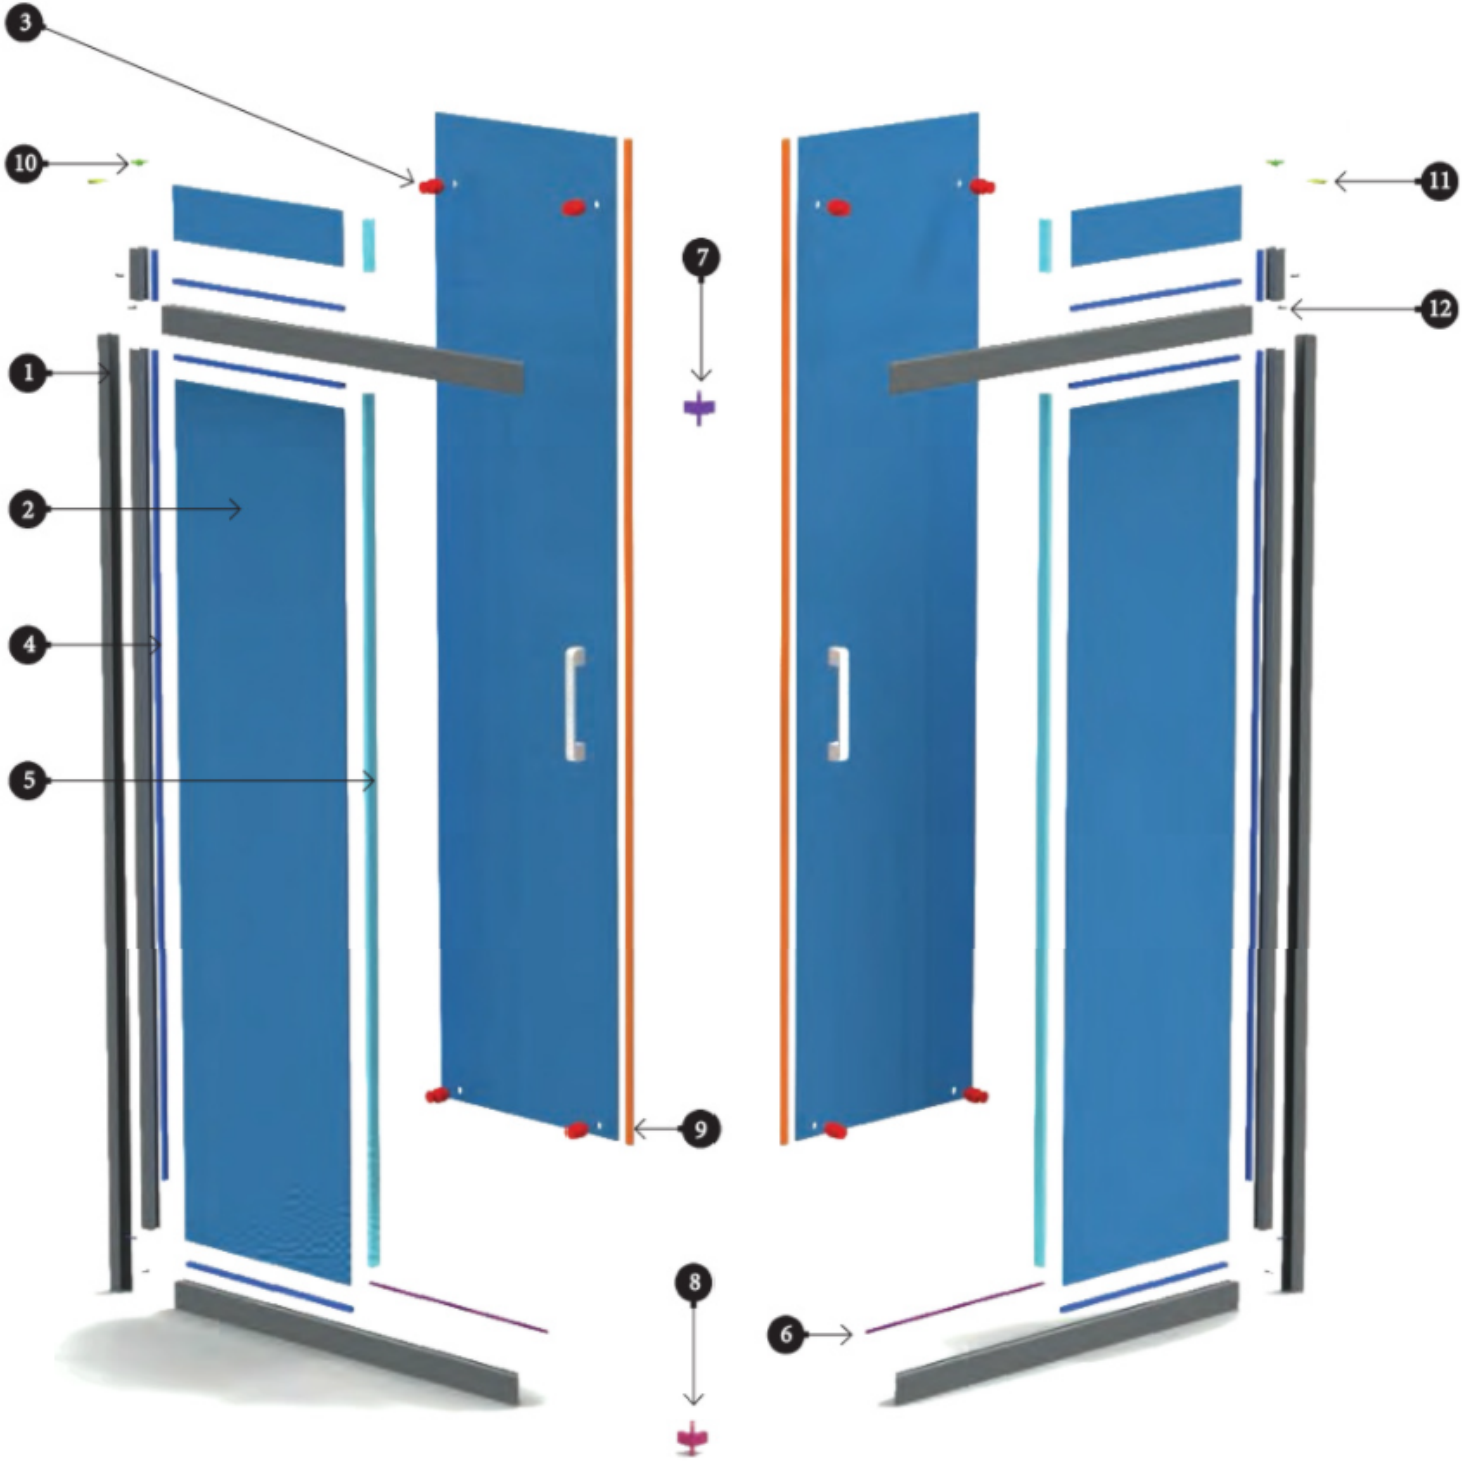

Another point of interest for this particular enclosure system is the additional glass lid for the top of the cabinet. This optional choice can make the appearance even more special.

Livorno allows its manufacturers to apply corner, oval and wall to wall straight shower enclosure types by 6 mm temper glass.

YENİ RELAX
 **SERIES**
Quality and Versatility

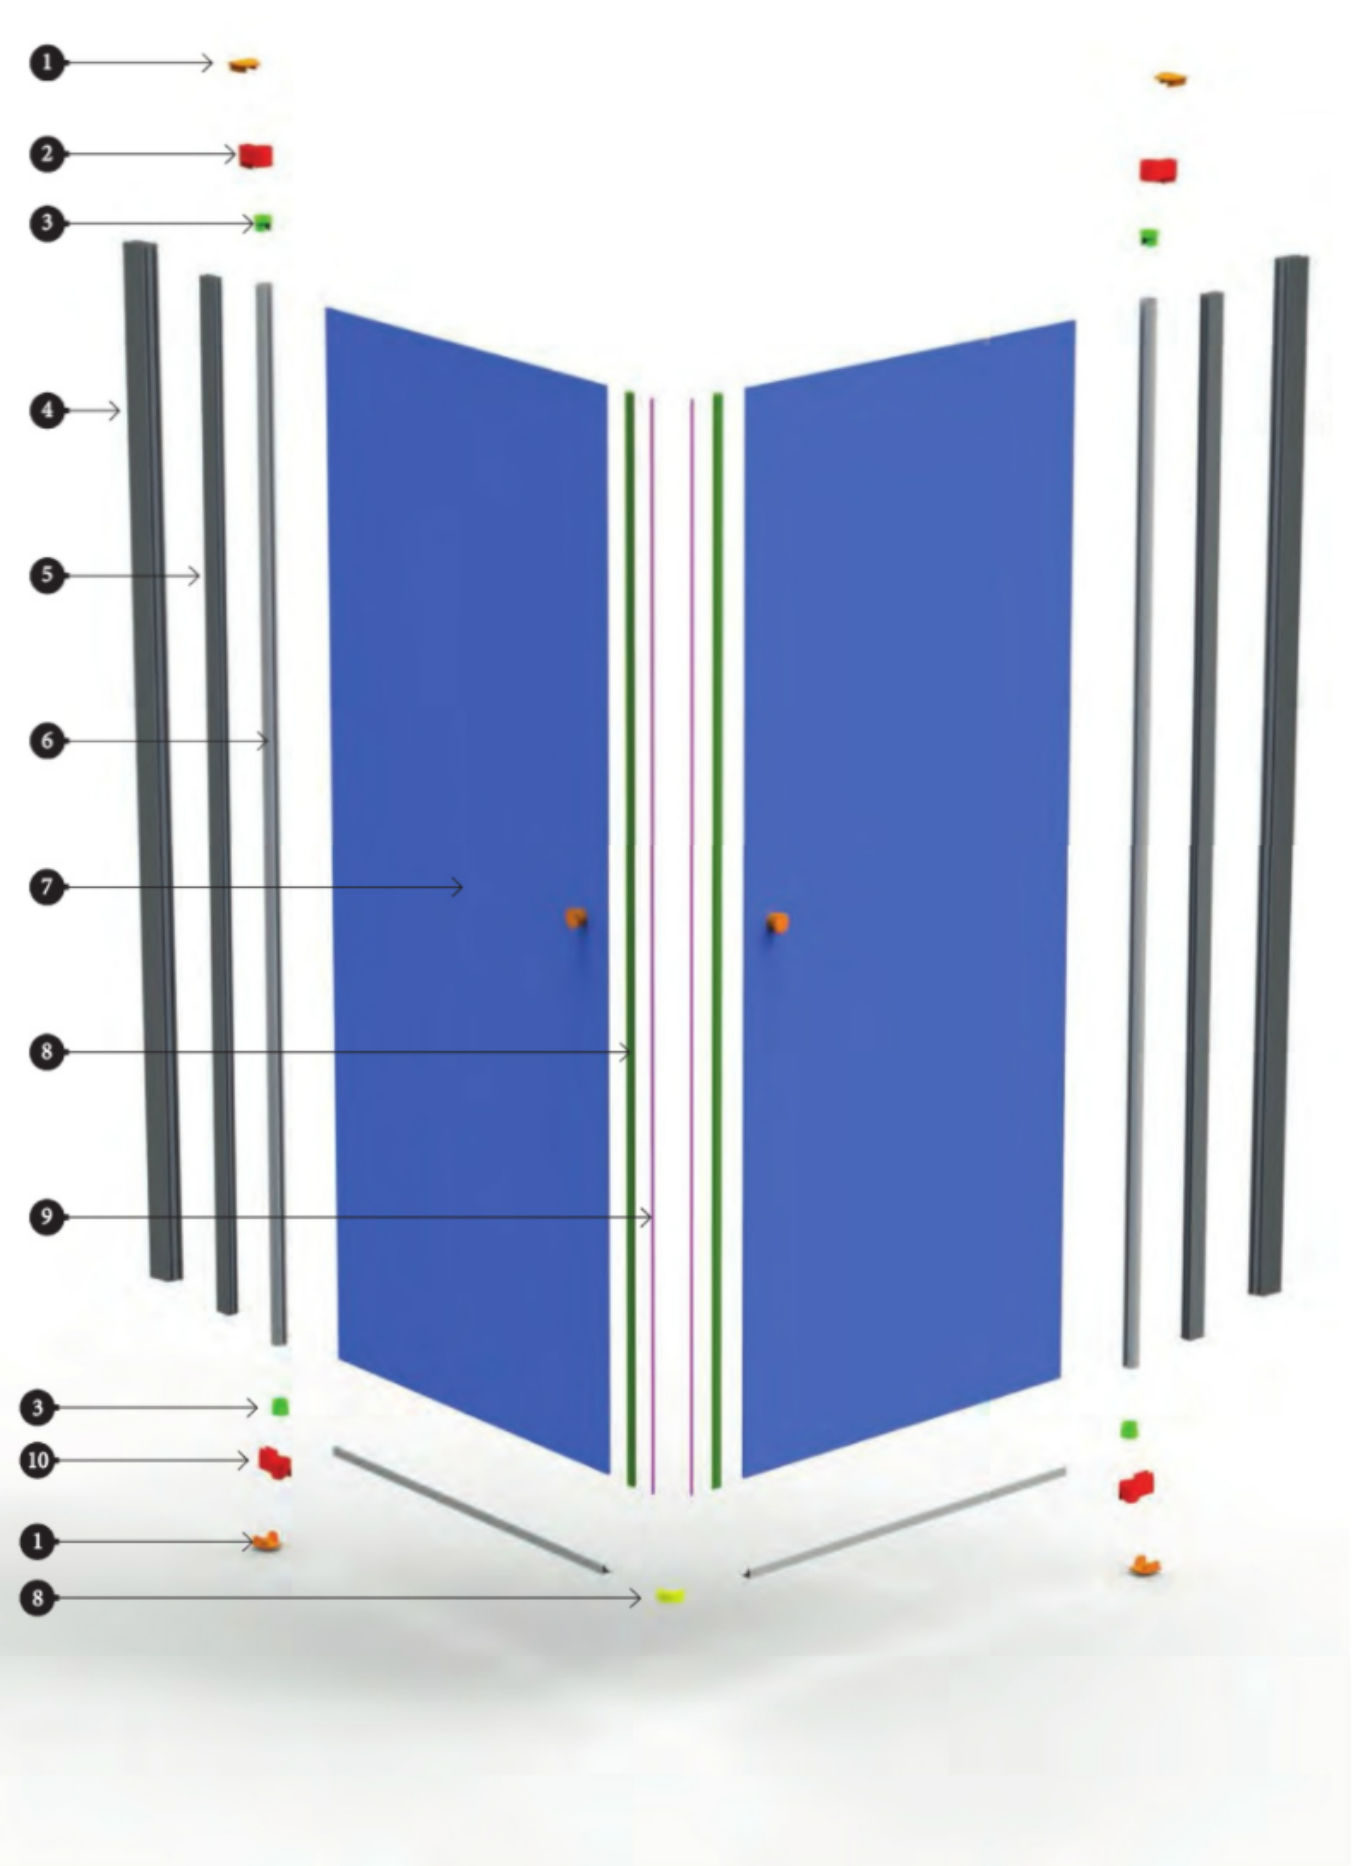

Product Specifications

Relax provides great advantage by using it's unique hing system. This system, allows the cabin door for back and forth moves. Furthermore, the sealing bar blocks the water leak from the bottom of the cabin. on the other hand, the appearance of the cabin becomes more elegant by this thin design of the sealing bar.

Relax system is suitable for the usage of 5 or 6 mm tempered glass.
